Hi Gloria,

I do not know the name of the new container supplier. The team (cc'd) might have that information.

Clarke hired a contract lab to test the new container type to confirm the absence of PFAS. They submitted a report to us which our chemists considered, in addition to the new storage stability/corrosion characteristics data for the new container type.

I hope this helps.

Best,
Catherine

Hi Catherine,

I hope this email finds you well. On the weekly container call, you mentioned that Clark had switched to another company for its containers. I was wondering if you knew the name of the company and what the container company is doing to ensure the lack of PFAS in their containers.

Best,
Gloria
